

## CARTER CONSTRUCTION (Derby) LTD

This is the first project we have carried out using Carter Construction (Derby) Limited, having been recommended by the Architect & Client on previous schemes.

Carter were successful in a competitive tender bid and have undertaken a complex scheme at a Derbyshire School involving the refurbishment of the main hall and stage to create a multi-functional Hall/ Theatre with retractable seating together with a Dressing Room & Studio extension on a design & construct basis.

There were numerous challenges, both in the design & procurement of various elements and in the subsequent construction and installation of specialist theatre services and equipment.

Although there were a number of Client driven changes added to the project to contend with, they worked pro-actively with the Client and their design team. Carter's demonstrated their expertise to overcome 'road blocks', produce workable solutions and alternatives for which they should be commended. As a result the project was completed on budget, to agreed timescales and to a high standard.

We will be recommending and utilising the services of Carter Construction (Derby) Limited on future projects within our portfolio of local Clients.

For and on behalf of Meller Ltd
