Dear Roger

## BELPER SCHOOL THEATRE

The end of a project is the perfect opportunity to write a letter to your contractor to compliment them for the fantastic job you have done at Belper School.

As a company you are as good as your word to be cooperative, claim free and proactive in the design and constructional process. This refurbishment project has been wonderfully fluid in response to the inevitable changes needed as we have met different circumstances on site. It is not easy but the budget has been adhered to with a flexible approach.

I would like to make special mention of Andy Newton on site. He has been a rock in understanding the project and contributing his skills and those of his team and subcontractors to offer and achieve solutions. It is of great comfort to the designer that your site agent is thinking about what he is trying to achieve and willing to offer improvements where there are any.

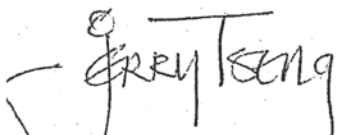

You personally have taken responsibility for the project and your offices organisation including Matt and Mark has been helpful throughout. I thank you for that.

We were blessed with a knowledgeable and helpful client. I believe that the whole team has achieved a project which is of credit to all concerned.

The school now has a great opportunity to learn from a professional quality theatre with thanks to your efforts.

I am happy to use this letter as an endorsement of your company as a recommendation to others.

Best Regards

Jerry Tseng
